Subject Index, Journal of Food Science, Volume 29, 1964

A

acidity in peas, 58
additives
  in eggs, 339, 693
  in sausage, 420
aldehdye determination, 6, 448, 576
alkanone determination, 6
amides, synthetic, 686
anthocyanins
  bleaching of, 16
  chelation studies on, 655
  fruit, 241, 723, 735
  glucose oxidation by bacteria, 644
  peroxidase effect on pigments, 53
antioxidants, 27, 269, 420, 693, 829
apple
  cellulose and pectins, 40
  continuous pressing device, 631
  juice volatiles, 448
aroma constituents, 393, 456, 460, 756
autoxidation of
  fats, 6
  lipids, 530
  myoglobins, 429

B

bacteria
  egg shell resistance to, 94
  glucose oxidation by, 644, 655
  on dipped poultry, 218

radiation sensitivity of, 641
radiolethality of, 80
storage for 20 years, 337
thermal destruction of, 345, 360, 469, 641, 859
tylosin destruction of, 475
bacteria in
beef, 87, 337
chicken gravy, 479
eggs, 339, 693
fish, 331, 710, 843
honey, 819
livers, 862
mushroom, 690
orange juice concentrate, 354
pork, 87, 100
soybean tempeh, 224
tray-packed chicken, 854
bakery products, egg contamination in, 339
beef
discoloration of, 535
flavors and odor precursors of, 136, 142
myoglobins in, 422, 429
press fluid in, 413
proteins, 168, 316
proteolytic activity determination, 602
putrefactive anaerobic spores in, 87, 337
radiation effect on, 837
storage of, 717
beets
cellulose and pectins of, 40
pyrrolidonecarboxylic acid of canned, 254
berries, effect of spray on, 744
bleaching of
anthocyanins, 16
chlorophylls, 379, 383, 389
boysenberry esters, 744
bread, protein determination of, 227
browning
enzyme-catalyzed oxidative, 829
in canned tuna, 750
retardation of, 693, 723

C

carbohydrate effect on eggs, 693
carbonyls in oxidizing fat, 6
carotenoids of fruit, 241
carrots, cellulose and pectins of, 40
cereals, 872
cherries
anthocyanin pigments in, 735
changes during ripening, 804
chicken protein, 168, 393, 544
changes in storage, 49, 540
chilies, oil of, 1
chlorophyll determinations, 379, 383, 389
chocolate aroma determinations, 456, 460
chromatography, 241, 393, 723
capillary-column gas, 583
cellulose-column, 422, 766
column, 25, 164, 266, 379, 383, 429, 446, 629, 804
distillation, 25
gas, 25, 123, 130, 149, 158, 246, 448, 456, 464, 569, 730, 796, 802, 814
gas-liquid, 487, 565, 744, 790, 877
ion-exchange, 136, 316, 435, 629, 710
paper, 123, 136, 164, 276, 460, 565, 602, 629, 715, 735, 804, 872
silica-gel, 629
silicic-acid, 276, 281
thin-layer, 565, 804, 808
vapor-phase, 576
cider, continuous pressing of apple, 631
coatings, fluid food, 483
coffee cherries, decomposition of muscilage layer, 850
color differences in red wines, 661
color of
beef, 535
fruits, 241
pork, 65, 70, 75, 175, 203, 210
vegetables, 379, 383, 389
color testing, 109
color, translucent measurement of, 782
composition of
animal tissues, 525
beef muscle, 413
boysenberries, 744
bread, 227
cheddar cheese, 583
chicken muscle, 393, 540
citrus fruits, 34, 276, 281, 766
citrus oils, 565
cowpeas, 118
diets
mice, 686
rabbit, 20
rat, 118, 130, 227
2,4-dinitrophenylhydrazine derivatives, 266
egg yolk granules, 307
eggs, powdered, 693
fatty acids in rabbits, 20
fluid food materials, 483
frozen foods, 540
honey, 819
liver lipid fatty acids, 130, 877
maple sap and syrup, 464
margarine, 164
meat, 136, 142, 182
mushroom mycelium, 690
nucleotides, 435
orange volatiles, 790
passion fruit wine, 569
peach volatiles, 723, 796
pear volatiles, 730
peas, 58, 540
pork muscle, 175, 590, 602, 615, 622
potatoes, 555
rutabagas, 149
squash, 715
sweet potatoes, 287
turkey muscle, 303
cowpeas, nutritive value of, 118

D

diets
mice, 686
rabbit, 20
rats, 118, 130, 227

discoloration of
beef, 535
potatoes, 555
vegetables, 58, 379, 383, 389
distillation of volatiles, 123, 192, 448, 576, 583
dried eggs, 693
dried fruit, color of, 257

E

egg, frozen yolk lipoproteins, 762
egg powder, effect of added carbohydrates, 693
egg shell resistance to bacteria, 94
egg yolk, low-density lipoproteins in, 307
eggs, resistance to bacteria, 339, 469
electrolyte binding of meat, 182
electrophoresis, starch gel, 544
enzymes, 53, 316, 372, 379, 383, 389, 540, 544, 808, 819
activity determinations of, 400
autolytic, 190
browning, 829
fungal, 224
pectic, 366
pectinolytic, 850
proteolytic, 49, 58, 407, 469, 602, 608
extract, maple flavor, 814

F

fats
analysis of, 109
autoxidation of
in margarine, 164
in meat, 168
fatty acids
diet effect in rabbits, 20
effect on pork, 70, 75
effect on starch gelatinization, 198
of liver lipids, 130, 877
fish
bacteria, 331
enzymes, 190
irradiation of, 190, 525
lipids, 327
method of assessing freshness, 710
protein, 168, 327
smoked, toxins in, 843
flavone, 27, 456, 460, 766
flavor
analysis, 58, 109, 112, 136, 142, 233, 490, 506, 520
beef, 136, 142, 413
canned beet, 254
cheddar cheese, 583
constituent of citrus oil, 565
determinations of 5′-nucleotides, 435
egg, 693
lamb, 136, 142
maple sap and sirup, 464
maple sirup, 814
meat, 136, 142
milk, 269
orange juice, 354
pork, 65, 70, 75, 109, 123, 136, 142
potato granules, 487
poultry, 303
volatiles, 149, 158, 448, 679, 730, 756, 790, 796
flour, wheat, 227
foods, sensory scoring of, 105, 109, 112, 506, 520
fruit
pectins, 366
radiation changes in, 366
sulfur dioxide absorption by, 257
volatiles, 246, 448
fruits
citrus, organic acids in, 276, 281
conversion of sugars to organic acids in strawberry, 629
low-carotenoid, 241

G

gelatinization of starch, 198, 544

H

hams
curing of, 65, 123
flavor analysis of, 520
shrinkage of, 65, 70
volatiles in dry-cured, 123
heat activation of bacillus spores, 635
herbicides, 744
honey, sensitivity of inhibine, 819

L

lactic acid determination in muscle, 808
lamb, flavor and odor precursors of, 136, 142
lemon oil, benzyl ether detection in, 802
lipid oxidation, 269, 379, 383, 389, 530
malonaldehyde measurement of, 294
retardation of, 27
lipids, 70, 75, 130, 307, 327, 530, 693, 762, 877
liver, dietary effects on, 130, 877

M

maple sap and sirup, 464
maple sirup flavor, 814
margarine, tocopherols in, 164
meat
curing, 182
hedonic-scale preference tests of, 520
protein determinations of, 168
water-extractable components of, 136, 142
water-holding capacity of, 413
mechanical damage to pears, 829
milk
changes during storage, 443
tocopherol distribution in, 269
mold, radiation sensitivity, 641
muscle, 182, 525
beef, 136, 142, 316, 413, 422, 429, 602, 681, 808, 837
fish, 190, 327
lamb, 136, 142
pork, 65, 70, 75, 136, 142, 175, 192, 203, 210, 590, 608, 615, 622, 681, 808
poultry, 49, 303, 393, 407, 530, 544, 597, 673
rabbit, 865
mushroom mycelium, B-vitamin composition of, 690
myoglobins, 316, 422, 429, 535

N

nisin as a preventive of bacterial spores in canned foods, 859
nootkatone, a new flavor constituent, 565
nucleotide determinations, 435
nutritive value of
  cowpeas, 118
  quinua and cañihua seed, 872

O

odor testing, 109, 499
  chicken precursors, 393
  chocolate precursors, 456, 460
  maple sap and sirup, 464
  meat precursors, 136, 142
  rutabagas, 149
oil
  chilies, 1
  lemon, 802
  lime, 576
  margarine, 164
  nootkatone in citrus, 565
  orange, 25
olfactory processes, electronic analog for, 372
orange
  flavone isolated in, 766
  juice, yeasts in, 354
  oil, beta-elemene in, 25
  pectins, 34
  volatiles, 790
organic constituents, 555, 715
oxidation of
  anthocyanins, 644
  lipids, 27, 130, 269, 294, 379, 383, 389, 420, 435, 535, 877
  maple sirup, 814

P

peach anthocyanins, 723
pear
  esters, 158, 730, 756
  polyphenoloxidases, 829
peas
  cytological distribution of calcium in seed, 768
  postharvest metabolism of, 58
pectins, 34, 40, 366
pesticides, 744
phenols, 266, 829
pigments, 829
  analysis of plant, 379
  anthocyanin, 53, 644, 655, 735
  beef, 422
plant tissues
  changes during radiation, 40
  changes in color, 58, 379, 383, 389
  effect of spray on, 744
poisoning, food, 862
polynomials, for unequal replications of orthogonal, 105
pork
  age-associated changes, 608, 615, 622
  ante-mortem treatments of, 210
  biochemical properties of, 65, 70, 75
  changes during rigor mortis, 175, 590
  dietary fat effects on rats, 130
  flavor and odor analysis of, 136, 142, 520
  freeze-dried, rehydration of, 192
  liquid nitrogen treatment of, 203
  protein, 168, 590
  putrefactive anaerobic spores in, 87, 100
potatoes, discoloration of, 555
potato granules, air storage determinations of, 487
poultry
  bruises, 407
  changes in protein during tenderizing, 597
  flavor analysis, 520
  gravy, bacteria in, 479
  microorganisms on dipped, 218
  microorganisms on tray-packed, 854
  origin of hydrogen sulfide in, 393
  storage, 49
preservation, irritation, 525
pressing theory on apples, 631
processing
  muscilage breakdown in coffee, 850
  nisin used in, 859
protein determinations, 168, 227

R

rabbits as experimental material, 865
radiation
  effect on beef muscle, 837
  effect on honey, 819
  effects on plant tissues, 40, 744
  sterilization, 641
radiolethality of bacteria, 80, 469, 641
reagent, Girard T, 6
reagents, 269
  anthocyanin reduction by, 16, 723, 829
regression coefficients, 109
  orthogonal polynomials for unequal replications, 105
residues, 744, 859

S

sage, effect on sausage, 420
salt in meat electrolyte binding, 182
sausage
  effect of sage chlorophyll in, 420
  emulsifying capacity, 774
solvents, oleoresin extraction of chilies, 1
soybeans, vitamin changes during molding, 224
spectrophotometry of
  anthocyanin pigments, 644, 655, 723
  enzymes, 829
  fish, 710
  muscles, 808
  oils, 565, 576, 802
  plant pigments, 379
  radioactive samples, 744
  red wines, 661
  sarcoplasmic protein, 602
  tocopherols, 164
  volatiles, 730, 756, 796
spoilage, flat sour, of low-acid canned food, 635
spray, effect on plants, 744

squashes, organic acids in, 715
starch, changes during gelatinization, 198, 544
storage of
  anaerobic spores for 20 years, 337
  beef muscle, 535
  chicken muscle, 49
  fish, 331, 710, 717
  frozen foods, 540
  liquid whole eggs, 339
  milk concentrate, 443
  orange juice, 354
  pork muscle, 175
  potato granules, 487
  poultry, 218
  turkey muscle, 303
  vegetables, 58, 379, 383, 389
strawberry fruit, conversion of sugars to organic acids in, 629
sweet potato, organic constituents of, 287
sweet-salty-sour taste relations, 233, 490

T

tempeh kedelee production, 224
tenderness
  analysis of, 109, 112, 681
  beef, 413, 717, 837
  fish, 717
  pork, 65, 70, 75, 109, 590, 602, 615, 622
  poultry, 112, 303, 544, 597, 673
tensile strength determinations of fluid food materials, 483
terpenes, 565, 576, 802
texture characteristics of, 483
  fruit, 366
  milk concentrate, 443
tocopherols in milk, 269
toxins, 80, 218, 843, 862
tuna, iron sulfide blackening in canned, 750
turkey
  lipids, 530
  proteins, 303
  toughness differences in, 673

V

vegetable extracts, antioxidant activity of, 27
vegetables
  analysis of, 287
  bacteria, 475
  color changes in, 379, 383, 389
  volatiles of, 149
volatiles
  apple juice, 448
  cheddar cheese, 583
  chicken muscle, 393
  distillation of, 123, 192, 294, 576, 583
  dry-cured ham, 123
  electronic determinations, 372
  fish, 710, 750
  flavor, 149, 583, 679, 756
  lime, 576
  nectarine, 246
  orange, 25, 790
  passion fruit wine, 569
  peach, 246, 796
  pear, 158, 730, 756

W

wheat flour, 227
wine
  acidity, 569
  analysis of, 506
  red, color differences, 661
  volatiles of passion fruit, 569

Y

yeast in
  bread, 227
  frozen orange concentrate, 354
  soybean tempeh, 224
yeast, radiation sensitivity of, 641
